7.9 Risk Disclosure

The Pension Fund Manager shall ensure that effective risk control measures are in place for the protection of the participants.

Participants must realize that all investments in pension Fund and securities are subject to market risks. Our target return cannot be guaranteed and it should be clearly understood that the portfolio of the Fund is subject to market price fluctuations and other risks inherent in all such investments. The risks emanate from various factors that include, but are not limited to:

1. **Equity Risk:** Share prices are generally volatile and may go up or down because of their dependence on market sentiments, speculative activity, supply and demand for the shares and liquidity in the market. Mutual funds that purchase shares become part owners in the companies. The companies' performance, domestic and/or industry outlook with respect to technological and consumer behavior dynamics, market activity and the larger economic scenario influence the price of these shares. Moreover, lack of trading in the investee companies' securities may result in liquidity crisis. When the economy is expanding, the outlook for many companies is positive and the value of these shares may rise, and vice versa. Share prices are also affected by the quality of the management of investee companies.
2. **Government Regulation Risk** - Government policies or regulations are more prevalent in some securities and financial instruments than in others. Funds that invest in such securities may be affected due to change in these regulations or policies, which directly or indirectly affect the structure of the security and/or in extreme cases a governmental or court order could restrain payment of capital, principal or income.
3. **Credit Risk** - Credit Risk comprises default risk, credit spread risk and down grade risk. Each can have negative impact on the value of the income and money market instruments including Sukuks etc.
4. **Default Risk** - The risk that the issuer of the security will not be able to pay the obligation, either on time or at all;
5. **Country or Political Risk** – The uncertainty of returns caused by the possibility of a major change in the political or economic environment of the country such as break down of law and order, war, natural disasters, etc. and any governmental actions or legislative changes or court orders restraining payment of principal or income.
6. **Price Risk** - The price risk is defined as when the value of the Fund, due to its holdings in such securities rises and falls as a result of change in interest rates.
7. **Liquidity Risk** – Liquidity risk is the possibility of deterioration in the price of a security in the Fund when it is offered for sale in the secondary market.
8. **Settlement Risk** – At times, the Fund may encounter settlement risk in purchasing / investing and maturing / selling its investments which may affect the Fund's performance etc.
9. **Reinvestment Rate Risk** – In a declining interest/ markup rate economic environment, there is a risk that maturing securities or coupon payments will be reinvested at lower rates, which shall reduce the return of the Fund compared to return earned in the preceding quarters.
10. **Sovereign Risk** - Payment of bonds/ notes may be affected by the economic and political events in the country of the relevant issuer. The occurrence of a sovereign risk event could result in the loss of all or a portion of the principal invested, as a result of any economic or political circumstance.

11. **Events Risk** - There may be adjustments to the performance of the Fund due to events including but not limited to, natural calamities, market disruptions, mergers, nationalization, insolvency and changes in tax law.
12. **Withdrawal Risk** - There may be special circumstances in which the withdrawal of Units may be suspended or the withdrawal payment may not occur within six working days of receiving a request for withdrawal from the participant.
13. **Shariah non-compliance Risk:** The risk associated with employing funds in investments that are not consistent with the Principles of Shariah.

7.10 Other Risks Involved:

- (a) Mismanagement of the investee company, third party liability whether through class action or otherwise or occurrence of other events such as strikes, fraud etc., in the company in which the investment is made.
- (b) Breakdown of law and order, war, terrorist activity, natural disasters etc.
- (c) Senior rights of some stake holders over other stake holders in the event of winding up.

7.10.1 Under exceptional (extraordinary) circumstances, the Pension Fund Manager may suspend withdrawal, invoke a queue system or announce winding-up of the Fund. In such events, the participant will probably have to wait for payment beyond the normal period and the withdrawal amount so determined may be lower than the price at the time the withdrawal request was lodged. Participants are advised to read the relevant clauses of the Fund's Trust Deed for more detailed information regarding this clause.

7.10.2 Risk specific to foreign investments: The Fund may invest outside Pakistan & such investments may be exposed to additional risks including political, economic & exchange rate risks that may reduce the value of the investments. However, evidence shows that diversifying internationally tends to reduce the overall volatility of the portfolio and thus may reduce risks for participants.

7.10.3 Investment in the Pension Fund is suitable for participants who have the ability to take the risks associated with financial and capital market investments. Capital invested in the financial and capital markets could, in extreme circumstances, lose its entire value. However, diversification of the investment into a number of highly liquid equities, income securities and repurchase transactions tends to reduce the risk substantially. The historical performance of the Funds, the financial and capital market or that of any one security or transaction included in the Fund's portfolio does not indicate the future performance.

7.10.4 There may be times when a portion of the investment portfolio of the Scheme is not compliant either with the investment policy or the minimum investment criteria of the assigned 'Category'. This non-compliance may be due to various reasons including, adverse market conditions, liquidity constraints or investment-specific issues. Participants are advised to study the latest Fund Manager Report specially portfolio composition and Financial Statements of the Scheme to determine what percentage of the assets of the Scheme, if any, is not in compliance with the minimum investment criteria of the assigned Category. The latest monthly

Replacement Offering Document-ABL Islamic Pension Fund

Fund Manager Report as per the format prescribed by Mutual Funds Association of Pakistan (MUFAP) is available on the website of the Pension Fund Manager (PFM) and can be obtained by calling / writing to the PFM.

7.10.5 There may be times that one or more investments made by the fund may cease to be, either temporarily or permanently, compliant with the requirements of Shariah. In this case, such investments will immediately be brought in the knowledge of the Shariah Advisor and steps will be taken to dispose-off or otherwise make the portfolio compliant with the requirements of Shariah as per the guidance of the Shariah Advisor.
