ECONOMY AND CAPITAL MARKETS UPDATE

Economic Review

May 2026 saw a modest easing in US–Iran tensions after April’s peak, helping stabilize global oil prices. Brent crude retreated from recent highs but remained elevated, reducing immediate concerns over supply disruptions through the Strait of Hormuz. While this provided some relief to energy-importing countries such as Pakistan, uncertainty and elevated commodity prices continued to pressure imported inflation and the external account. Inflation increased further, with headline CPI rising to 11.66% YoY in May 2026 from 10.9% in April, remaining well above the SBP’s 5–7% target range. The increase was mainly driven by fuel, energy, and food prices. Transport costs remained high, while housing & utilities also contributed significantly. Core inflation stayed sticky, indicating persistent underlying price pressures and second-round effects. On the external front, Pakistan recorded a current account deficit of USD 324mn in April (latest available), compared to a surplus of USD 1.134bn in March. The cumulative Jul–Apr FY26 balance stood at a modest deficit of USD 252mn. Remittances remained strong at USD 3.539bn in April, bringing Jul–Apr inflows to USD 33.858bn (+8.5% YoY). However, a wider trade deficit due to rising imports weighed on the external position. Foreign exchange reserves improved to USD 22.65bn as of 22 May 2026 (SBP: USD 17.15bn; Commercial Banks: USD 5.50bn), providing around 3.3 months of import cover on total reserves and supporting near-term exchange rate stability. Fiscal performance remained challenging. FBR tax collections reached PKR 11.23tn during Jul–May FY26, up 10.0% YoY, but remained approximately PKR 860bn below the revised target. May collections stood at approximately PKR 960bn (+7% YoY) yet missed the monthly target by around PKR 30bn. The shortfall highlights continued tax mobilization challenges and reliance on non-tax revenues and expenditure controls to achieve fiscal objectives. The real economy continued to show resilience. Large-Scale Manufacturing (LSM) grew by 6.5% during Jul–Mar FY26, supported by automobiles, cement, pharmaceuticals, and construction-related industries, with momentum continuing into April and May. Real GDP growth is estimated at around 3.5–4.0% for FY26. While wheat production was slightly below target due to adverse weather, cotton and rice outlooks remained encouraging. Structural pressures in the energy sector persisted. Power sector circular debt stood at PKR 1.795tn by end-May, down slightly from PKR 1.812tn in April, while gas circular debt remained elevated at around PKR 3.45tn. Government efforts continued through tariff rationalization, improved recoveries, and SOE reforms, though transmission losses and operational inefficiencies remain key challenges. On the policy front, the SBP maintained the policy rate at 11.5% in April, balancing inflation risks with economic growth considerations. Pakistan also received the first IMF tranche of USD 1.2bn during the month, strengthening reserves and improving external financing visibility. Going forward, sustained progress on tax, energy, and governance reforms will remain critical for maintaining macroeconomic stability during the remainder of FY26.

Money Market Review

Inflation dynamics in May 2026 showed a further acceleration, with both headline and core inflation increasing during the month. Headline CPI rose to 11.66% YoY in May compared to 10.89% YoY in April. Meanwhile, core inflation increased to 8.75% YoY from 8.19% YoY in the previous month, indicating a continued buildup in underlying inflationary pressures. Within core components, core rural inflation moderated slightly to 8.37% YoY from 8.52% YoY, while core urban inflation increased to 9.00% YoY from 7.97% YoY, reflecting persistent inflationary pressures across urban segments. Food inflation increased to 7.29% YoY from 7.05% YoY, while non-food inflation accelerated further to 14.81% YoY from 13.72% YoY, primarily driven by higher transportation costs, elevated energy-related expenses, and continued strength in non-perishable food prices. The sharp rise in non-food inflation and urban core inflation indicates growing second-round effects and persistent underlying inflationary pressures across the economy. There was no Monetary Policy Committee (MPC) meeting during May 2026, and the State Bank of Pakistan maintained the policy rate at 11.50% throughout the month. On the liquidity front, the State Bank of Pakistan (SBP) conducted a Treasury Bills auction during the month, attracting total participation of PKR 4.17 trillion, against which PKR 1.60 trillion was accepted. Cut-off yields in the latest auction stood at 12.06%, 12.31%, 12.40%, and 12.59% for the 3-month, 6-month, 9-month, and 12-month tenors, respectively. In the Pakistan Investment Bonds (PIB) auction, total participation amounted to PKR 458 billion, while the accepted amount stood at PKR 180 billion. Meanwhile, participation in the Pakistan Investment Bond Floating Rate (PFL) auction amounted to PKR 1.52 trillion; however, no bids were accepted during the auction. On the external front, the cumulative current account balance during 10MFY26 posted a marginal deficit of USD 252 million, compared to a deficit of USD 1.66 billion during the corresponding period last year, reflecting resilience in the external account despite higher import and energy-related payments. Foreign exchange reserves improved during the month, with total reserves increasing to USD 22.64 billion as of 29 May 2026, compared to USD 20.80 billion as of 30 April 2026. Within this, SBP-held reserves increased to USD 17.19 billion, while commercial banks' reserves stood at USD 5.45 billion. Overall, May reflected continued tightness in money market conditions, characterized by higher inflation and elevated short-term market yields. The further increase in both headline and core inflation, particularly within non-food components, highlights intensifying underlying inflationary pressures across the economy. Meanwhile, ongoing geopolitical uncertainty, volatile energy prices, higher transportation costs, and persistent supply-side risks continue to cloud the macroeconomic outlook. Money market yields remained volatile throughout the month, particularly at the shorter end of the curve, and generally traded on the higher side amid persistent inflation concerns and expectations of an extended tight monetary policy stance. In contrast, medium- to long-term yields declined modestly during the month, resulting in a flatter yield curve. While improving foreign exchange reserves and a relatively contained current account position provided support to macroeconomic stability, market participants remained cautious as the SBP continued to prioritize price stability and inflation management.

Stock Market Review

KSE-100 index closed at 173,962.82 in May'26, rising 6.73% MoM (+10,968.7 points). During the month, average value traded declined to USD 82.72Mn (down 28.98% MoM) while average volume fell to 309.49Mn shares (down 25.66% MoM). Net FPI recorded an outflow of USD 17.08Mn. Market sentiment remained resilient but cautious as Pakistan stepped up its mediator role while the US and Iran drew closer to a potential deal, though global energy prices stayed volatile amid persistent supply disruptions. LNG supplies continued to face challenges due to the Middle-East conflict. The IMF Executive Board approved the 3rd review of the EFF and disbursed USD 1.3Bn, while adding 11 new structural conditions for future tranches. The government committed to a 2% Primary Surplus for the next fiscal year and increased the petroleum levy to bridge the revenue shortfall. Pakistan also issued RMB 1.75Bn Panda Bonds at a competitive 2.5% coupon and awarded offshore exploration blocks after a gap of nearly 20 years. Headline inflation for April'26 stood at 10.9%, with May'26 NCPI recorded at 11.66%. The April balance of payments came under pressure on a sequential basis due to a spike in the oil import bill and declining remittances. On the security front, the internal situation became fragile following fresh terrorist attacks in KP and Balochistan, which were strongly countered by security forces. On the domestic institutional side, Commercial Banks emerged as the top buyer with 82.36% of net buying, followed by Cement at 31.31%. On the selling side, Oil & Gas Exploration was the biggest seller at -27.67%, followed by Technology & Communication at -8.97%.

In Ijarah Sukuk auctions conducted during the month, variable-rate Sukuk (VRR) attracted bids worth PKR 517.1 billion, against which PKR 165.5 billion was accepted, reflecting continued investor preference for floating-rate instruments amid elevated interest rates and inflationary pressures. Meanwhile, fixed-rate Sukuk (FRR) received bids amounting to PKR 2.75 billion; however, no bids were accepted in the fixed-rate segment, indicating limited investor appetite for locking in fixed yields under the prevailing interest rate environment. On the external front, the cumulative current account balance during 10MFY26 posted a marginal deficit of USD 252 million, compared to a deficit of USD 1.66 billion during the corresponding period last year, reflecting resilience in the external account despite higher import and energy-related payments. FUND MANAGER'S COMMENTS

ABL-SF increased by 6.94% in May'26 against 6.73% increase in the benchmark, reflecting an outperformance of 21 basis points. KSE-100 index closed at 173,962.82 in May'26, rising 6.73% MoM (+10,968.7 points). During the month, average value traded declined to USD 82.72Mn (down 28.98% MoM) while average volume fell to 309.49Mn shares (down 25.66% MoM). Net FIPI recorded an outflow of USD 17.08 Mn. Market sentiment remained resilient but cautious as Pakistan stepped up its mediator role while the US and Iran drew closer to a potential deal, though global energy prices stayed volatile amid persistent supply disruptions. LNG supplies continued to face challenges due to the Middle-East conflict. The IMF Executive Board approved the 3rd review of the EFF and disbursed USD 1.3Bn, while adding 11 new structural conditions for future tranches. The government committed to a 2% Primary Surplus for the next fiscal year and increased the petroleum levy to bridge the revenue shortfall. Pakistan also issued RMB 1.75Bn Panda Bonds at a competitive 2.5% coupon and awarded offshore exploration blocks after a gap of nearly 20 years. Headline inflation for April'26 stood at 10.9%, with May'26 NCPI recorded at 11.66%. The April balance of payments came under pressure on a sequential basis due to a spike in the oil import bill and declining remittances. On the security front, the internal situation became fragile following fresh terrorist attacks in KP and Balochistan, which were strongly countered by security forces. On the domestic institutional side, Commercial Banks emerged as the top buyer with 82.36% of net buying, followed by Cement at 31.31%. On the selling side, Oil & Gas Exploration was the biggest seller at -27.67%, followed by Technology & Communication at -8.97%.

FUND MANAGER'S COMMENTS

ABL-ISF increased by 6.85% in May'26 against 7.01% increase in the benchmark, reflecting an underperformance of 16 basis points. KMI-30 index closed at 250,496, up 7.01% MoM (+16,398.72 points). Average value traded in KMI-30 stood at USD 55.27Mn (down 17.60% MoM) while average volume declined to 138.36Mn shares (down 27.45% MoM). Net FIPI recorded an outflow of USD 17.08Mn. Market sentiment remained resilient but cautious as Pakistan stepped up its mediator role while the US and Iran drew closer to a potential deal, though global energy prices stayed volatile amid persistent supply disruptions. LNG supplies continued to face challenges due to the Middle-East conflict. The IMF Executive Board approved the 3rd review of the EFF and disbursed USD 1.3Bn, while adding 11 new structural conditions for future tranches. The government committed to a 2% Primary Surplus for the next fiscal year and increased the petroleum levy to bridge the revenue shortfall. Pakistan also issued RMB 1.75Bn Panda Bonds at a competitive 2.5% coupon and awarded offshore exploration blocks after a gap of nearly 20 years. Headline inflation for April'26 stood at 10.9%, with May'26 NCPI recorded at 11.66%. The April balance of payments came under pressure on a sequential basis due to a spike in the oil import bill and declining remittances. On the security front, the internal situation became fragile following fresh terrorist attacks in KP and Balochistan, which were strongly countered by security forces. On the domestic institutional side, Commercial Banks emerged as the top buyer with 82.36% of net buying, followed by Cement at 31.31%. On the selling side, Oil & Gas Exploration was the biggest seller at -27.67%, followed by Technology & Communication at -8.97%.

FUND MANAGER'S COMMENTS

ABL-IDSF increased by 7.25% in May'26 against 7.01% increase in the benchmark, reflecting an outperformance of 24 basis points. KMI-30 index closed at 250,496, up 7.01% MoM (+16,398.72 points). Average value traded in KMI-30 stood at USD 55.27Mn (down 17.60% MoM) while average volume declined to 138.36Mn shares (down 27.45% MoM). Net FIPI recorded an outflow of USD 17.08Mn. Market sentiment remained resilient but cautious as Pakistan stepped up its mediator role while the US and Iran drew closer to a potential deal, though global energy prices stayed volatile amid persistent supply disruptions. LNG supplies continued to face challenges due to the Middle-East conflict. The IMF Executive Board approved the 3rd review of the EFF and disbursed USD 1.3Bn, while adding 11 new structural conditions for future tranches. The government committed to a 2% Primary Surplus for the next fiscal year and increased the petroleum levy to bridge the revenue shortfall. Pakistan also issued RMB 1.75Bn Panda Bonds at a competitive 2.5% coupon and awarded offshore exploration blocks after a gap of nearly 20 years. Headline inflation for April'26 stood at 10.9%, with May'26 NCPI recorded at 11.66%. The April balance of payments came under pressure on a sequential basis due to a spike in the oil import bill and declining remittances. On the security front, the internal situation became fragile following fresh terrorist attacks in KP and Balochistan, which were strongly countered by security forces. On the domestic institutional side, Commercial Banks emerged as the top buyer with 82.36% of net buying, followed by Cement at 31.31%. On the selling side, Oil & Gas Exploration was the biggest seller at -27.67%, followed by Technology & Communication at -8.97%.
