Investors must realize that all investments in mutual Funds and securities are subject to market risks. A target return / dividend range cannot be guaranteed and it should be clearly understood that the portfolio of the Investment Plans is subject to market price fluctuations and other risks inherent in all such investments. The risks emanate from various factors that include, but are not limited to:

- (1) **Government Regulation Risk** - Government policies or regulations are more prevalent in some securities and financial instruments than in others. Funds that invest in such securities may be affected due to change in these regulations or policies, which directly or indirectly affect the structure of the security and/or in extreme cases a governmental or court order could restrain payment of capital, principal or income.
- (2) **Country or Political Risk** – The uncertainty of returns caused by the possibility of a major change in the political or economic environment of the country such as break down of law and order, war, natural disasters, etc. and any governmental actions or legislative changes or court orders restraining payment of principle or income.

- (3) **Interest Rate Risk** – A rise or decline in interest rates during the investment term may result in a change in return provided to investors
- (4) **Credit Risk** - Credit Risk comprises Default Risk and Credit Spread Risk and Downgrade Risk. Each can have negative impact on the value of the income and money market instruments including Sukuks.
 - **Default Risk** - The risk that the issuer of the security will not be able to pay the obligation, either on time or at all;
 - **Credit Spread Risk** - The risk that there may be an increase in the difference between the Profit/return of any issuer's security and the return/markup rate of a risk-free security. The difference between this return/mark up rates is called a "credit spread". Credit spreads are based on macroeconomic events in the domestic or global financial markets. An increase in credit spread will decrease the value of income and including money market instruments;
- (5) **Price Risk** - The price risk is defined as when the value of the Fund, due to its holdings in such securities rises and falls as a result of change in market/ interest rates.
- (6) **Liquidity Risk** – Liquidity risk is the possibility of deterioration in the price of a security in the Fund when it is offered for sale in the secondary market.
- (7) **Settlement Risk** – At times, the Fund may encounter settlement risk in purchasing / investing and maturing / selling its investments which may affect the Fund’s performance etc.
- (8) **Reinvestment Rate Risk** –In a declining interest/ markup rate economic environment, there is a risk that maturing securities or coupon payments will be reinvested at lower rates, which shall reduce the return of the Fund compared to return earned in the preceding quarters.
- (9) **Events Risk** - There may be adjustments to the performance of the Fund due to events including but not limited to, natural calamities, market disruptions, mergers, nationalization, insolvency and changes in tax law.
- (10) **Redemption Risk** – There may be special circumstances in which the redemption of Units may be suspended or the redemption payment may not occur within six working days of receiving a request for redemption from the investor.
- (11) **Distribution Taxation Risk** – Dividend distribution may also be liable to tax because the distributions are made out of the profits earned by fund and not out of the profits earned by each unit holder. Unit holders who invest in a fund before distribution of dividends may be liable to pay tax even though they may not have earned any gain on their investment as return of capital to investors upon distribution is also taxable.
- (12) **Shariah non-compliance Risk**- The risk associated with employing funds in investments that are non-compliant with the Shariah.
- (13) **Additional Risk** - In case of initiation of any legal proceedings or any case is filed against the Fund impacting any Investment plan, it may also affect the unitholders of other Investment Plan(s) offered under the same Fund.

- Any other situation in which issuance of fresh Units is, in Management Company's opinion, against the interests of the existing/remaining Unit Holders of each investment plan.

Such suspension may, however, not affect existing Unit Holders for the issue of bonus Units as a result of profit distribution. The Management Company shall announce the details of circumstances at the time a suspension of fresh issue is announced. The Management Company shall immediately notify SECP and Trustee if issuance of Units of an Investment Plan is suspended and shall also have the fact published, immediately following such decision, in the newspapers in which the Investment Plan's prices are normally published.

In case of suspension of redemption of Units due to extraordinary circumstances the issuance of Units shall also be kept suspended until and unless redemption of Units is resumed. In case of suspension of issuance of Units of an Investment Plan, the issuance of units of other Investment Plans may continue unaffected.

Investment application form received on the day of suspension will not be processed and the amount received shall be returned to the investor.

4.10.4 Queue System

The Management Company shall proceed to sell adequate assets of the pertinent Investment Plan and / or arrange shariah compliant financing as it deems fit in the best interest of all Unit Holders of the pertinent Investment Plan, and shall determine the redemption price for units under the pertinent Investment Plan(s) to be applied to the redemption requests based on such action. Where it is not practical to determine the chronological ranking of any requests in comparison to others received on the same Dealing Day, such requests shall be processed on a basis proportionate to the size of the requests. The Management Company shall provide all redemption requests duly time-and date-stamped, to the Trustee within 24 hours of receipt of any such request following the queue system. However, if the carried-over requests and the fresh requests received on the next Dealing Day still exceed ten percent (10%) of the Units in issue of the Investment Plan, these shall once again be treated on a first-come, first served basis, and the process for generating liquidity and determining the redemption price shall be repeated. Such procedure shall continue till such time the outstanding redemption requests come down to a level below ten percent (10%) of the outstanding Units of the Investment Plan.

4.10.5 Winding up in view of Major Redemptions
