REPORT OF THE DIRECTORS OF THE MANAGEMENT COMPANY

The Board of Directors of ABL Asset Management Company Limited, the management company of ABL Islamic Financial Planning Fund (ABL-IFPF), is pleased to present the Financial Statements (audited) of ABL - IFPF for the year ended on June 30, 2025.

ECONOMIC PERFORMANCE REVIEW

Fiscal Year 2025 marked a decisive turn in Pakistan's macroeconomic trajectory, underpinned by policy stability, successful completion of an IMF Standby Arrangement, and a sustained focus on structural reforms. The year was characterized by declining inflation, a shift toward monetary easing, and notable improvements in external account stability - all against the backdrop of improving political sentiment and contained global commodity prices.

Pakistan's real GDP grew by 2.68% in FY25 (provisional), slightly higher than the 2.51% growth recorded in FY24, signaling a modest but broad-based economic recovery. Sector-wise performance showed mixed trends: the agriculture sector, after a remarkable 6.4% growth in FY24, moderated to 0.56% in FY25 due to base effects and seasonal challenges. The industrial sector rebounded strongly, recording a 4.77% growth in FY25 compared to a contraction of 1.37% in the previous year, reflecting improved energy availability and policy support. The services sector also gained momentum, expanding by 2.91% in FY25 versus 2.19% in FY24, supported by financial services, trade, and public administration.

Inflationary pressures, while elevated at the start of the year, eased sharply over time and remained on downward trajectory this year. The Consumer Price Index (CPI) averaged 4.61% in FY25 as compared to 23.9% in FY24, supported by a high base effect, improved food supplies, and declining global energy prices. The policy rate, which stood at 20.5% at the start of the fiscal year, was gradually brought down in phases to 19.5% by July, 17.5% by October, and 13.0% by December. With continued disinflation and improved external stability, the central bank further reduced the rate to 12.0% by March and finally to 11.0% by May 2025, maintaining it at that level through the fiscal year-end. This cumulative 950bps easing reflected growing confidence in macroeconomic stabilization and marked a decisive shift from the previous tight policy stance.

The external account performance was notably strong, with the current account posting a cumulative surplus of USD 2.1 billion in FY25 compared to a deficit of USD 2.07 billion in the same period last year. This improvement was significantly supported by robust remittance inflows, which rose to USD 38.3 billion in FY25, up from USD 30.25 billion in FY24. The PKR remained largely stable in both interbank and open markets, reflecting improved reserve buffers and reduced speculative pressures. Foreign exchange reserves followed an upward trajectory throughout FY25. Total reserves rose from USD 13.99 billion in June 2024 to USD 19.27 billion by June 2025, while SBP's own reserves improved from USD 9.39 billion to USD 14.51 billion. This improvement was underpinned by multilateral inflows - including the final IMF SBA tranche approved on April 29, 2025 - along with bilateral support and better market sentiment. The reserve buildup further reinforced confidence and external sector resilience.

On the fiscal side, the Federal Board of Revenue (FBR) reported provisional collections of PKR 11.72 trillion, reflecting continued momentum in tax administration reforms and economic formalization. The government also presented the FY26 Federal Budget in June 2025, which emphasized revenue expansion, expenditure discipline, and alignment with IMF benchmarks - laying the groundwork for the next Extended Fund Facility (EFF) program.

Despite intermittent global volatility - particularly stemming from the Iran-Israel conflict and renewed tariff uncertainty under U.S. political developments - global commodity and oil prices remained volatile but generally followed a downward trajectory. This external softness played a supportive role in containing Pakistan's inflation and narrowing the current account deficit. Combined with political continuity and improved governance, these

trends contributed to a more stable macroeconomic environment, helping strengthen market sentiment across equity and fixed income markets while also supporting a more favorable business climate.

In summary, FY25 was a turning point, characterized by macroeconomic stabilization, a return to current account surpluses, softening inflation, and the beginning of monetary easing. The foundation laid this year provides a supportive platform for medium-term growth, contingent on sustained reform implementation and continued global financial support.

MUTUAL FUND INDUSTRY REVIEW

In fiscal year 2025, the open-end mutual fund industry recorded robust growth, with assets under management (AUM) increasing by 44.02% year-on-year, from PKR 2,677 billion to PKR 3,859 billion. Significant inflows were observed in money market funds, both Conventional and Islamic, which grew by PKR 578 billion (43.67%) year-on-year, reaching a balance of PKR 1,904 billion. Equity market funds, encompassing both Conventional and Islamic categories, also experienced substantial growth of PKR 408 billion (98.98%) year-on-year. This expansion was driven by improving macroeconomic conditions, positive investor sentiment, and a favorable capital markets outlook. However, Capital Protected Funds and Shariah Compliant Fund of Funds saw declines of PKR 6,365 million (10.28%) and PKR 716 million (19.28%) year-on-year, respectively.

MONEY MARKET REVIEW ISLAMIC

FY2025 marked a turning point for Pakistan's monetary environment, driven by sharp disinflation, monetary easing, and improved macroeconomic indicators. The Consumer Price Index (CPI) averaged 4.61% YoY, down significantly from 23.9% in FY2024, primarily due to favorable base effects, declining global commodity prices, and improved domestic food and energy supply dynamics. The main contributors to inflation during the early part of the year were food, transport, and housing segments; however, pressures eased sharply over the second half.

The State Bank of Pakistan (SBP) maintained a tight monetary stance for most of the fiscal year, holding the policy rate at 22% until late 2024. As inflation decelerated and real interest rates turned positive, the SBP initiated its easing cycle and the policy rate, which stood at 20.5% at the start of the fiscal year, was gradually brought down in phases to 19.5% by July, 17.5% by September, and 13.0% by December, 12.0% by January and finally to 11.0% by May 2025 bringing the policy rate down to 11.00% by year-end. As of June 2025, SBP's foreign exchange reserves stood at USD 14.51 billion, providing adequate buffers to support further easing without jeopardizing external account stability.

During the FY25, considerable market participation was observed in the variable rate Ijarah Sukuk as the total participation stood at PKR 3,902bn against a target of PKR 771bn. The Ministry, however ended up borrowing a total of PKR 1,275bn in the variable rate Ijarah Sukuk. In fixed rate Ijara sukuks, participation stood at PKR 1,266bn against the target of PKR 760bn in 1Y, 3Y & 5Y tenors. Ministry ended up borrowing PKR 296bn in 3Y, 5Y & 10Y tenors.

STOCK MARKET REVIEW (ISLAMIC)

The KMI-30 index delivered an impressive performance in FY25, closing at 184,886.50 points, with a strong annual gain of 46.24%. Momentum was driven by both cyclical and policy-driven themes, with Shariah-compliant sectors particularly benefiting from a stable macroeconomic environment and improved clarity on the fiscal roadmap. Average traded volumes rose 74.86% to 91.38 million shares, while average daily traded value improved 141.77% YTD to USD 34.86 million.

The continuation of the IMF EFF program and the government's privatization pipeline-including plans to offload stakes in SOEs and energy companies-further strengthened investor sentiment. Additionally, sustained control over smuggling, hawala operations, and speculative currency activity added credibility to Pakistan's narrative of external account stability.

The State Bank of Pakistan maintained a data-driven monetary policy stance, cutting the policy rate from 22% to 11% in response to declining CPI inflation, which averaged around 4.62% during the year. As a result, real interest rates turned positive by a notable margin, enhancing long-term investor confidence.

Foreign investors were net sellers, recording an outflow of USD 304.34 million during the year. On the domestic side, Banks and Other Organization posted net selling of USD 15.68 million and USD 7.54 million, respectively. In contrast, Mutual Funds and Companies supported the market with net purchases of USD 218.54 million and USD 51.12 million, respectively.

MACROECONOMIC BACKDROP

The FY25 period has been marked by a remarkable decline in inflation, with the Consumer Price Index (CPI) dropping to a historic low of 0.28% YoY in April 2025, before rising modestly to 3.24% YoY by June 2025, compared to 12.57% in June 2024. This moderation, driven by improved supply dynamics, stable core categories, and favorable base effects, reflects enhanced macroeconomic stability. Core inflation, while slightly elevated, eased annually to 6.9% (urban) and 8.6% (rural) by June 2025, signaling manageable inflationary pressures.

The external account has shown resilience, with the current account posting a cumulative surplus of USD 2.1 billion in FY25, a significant improvement from a USD 2.0 billion deficit in the prior year. Worker remittances surged to USD 38.3 billion (+26.4% YoY) by June 2025, bolstered by stable exchange rates and enhanced formal channels. Exports grew by 8.1% YoY to USD 30.9 billion, despite global demand constraints, while SBP's foreign exchange reserves rose to USD 14.51 billion by June 2025, supported by IMF disbursements, climate financing, and multilateral inflows, including a USD 2 billion deposit extension from the UAE and the USD 40 billion Pakistan Partnership Framework from the World Bank.

The SBP's data-driven monetary policy stance, coupled with fiscal consolidation measures outlined in the Federal Budget FY26 (announced June 10, 2025), emphasizes tax base expansion and state-owned enterprise reforms. However, challenges such as revenue mobilization, circular debt, and external debt servicing persist, compounded by global geopolitical tensions and trade disruptions, necessitating vigilant risk management.

Investment Strategy

- **Islamic Income Segment:** We are shifting from longer-term fixed rate Sukuk to floating rate Sukuk. Active trading in GoP Ijarah Sukuk at optimal yields will further augment returns.
- **Islamic Money Market Segment:** An aggressive approach will be maintained, with higher allocations in GoP Ijarah Sukuk to enhance returns. However, for Islamic Cash Funds, we adopt a conservative stance, minimizing exposure to GoP Ijarah Sukuk to prioritize liquidity and stability.
- **Risk Mitigation:** We will closely monitor market dynamics and adjust allocations to balance yield optimization with Shariah-compliant liquidity requirements, ensuring alignment with investor mandates.

Risks and Considerations

Despite the positive outlook, several risks warrant attention:

- **External Pressures:** Geopolitical tensions, including US-China trade disputes and regional frictions with India, alongside external debt servicing, could strain foreign reserves.
- **Domestic Challenges:** Weak revenue mobilization, circular debt, and industrial output constraints remain structural hurdles. The Federal Budget FY26's success in implementing fiscal reforms will be critical.
- **Policy Uncertainty:** While further policy rate cuts to 10% are possible, the SBP's cautious stance suggests limited room for aggressive easing without robust macroeconomic support.

The FY25 money market outlook for both conventional and Islamic segments is characterized by cautious optimism, driven by declining inflation, a resilient external account, and monetary policy easing. Our strategy emphasizes flexibility, with a focus on shorter-tenor instruments and selective Sukuk allocations to optimize yields while maintaining liquidity. By actively managing duration, negotiating favorable deposit deals, and monitoring macroeconomic and geopolitical developments, we aim to deliver stable returns while mitigating risks in an evolving economic landscape. As we move into FY26, disciplined fiscal and monetary policies, alongside sustained external support, will be pivotal in sustaining Pakistan's economic stabilization and unlocking further investment opportunities.

However, challenges such as revenue mobilization, circular debt, and external debt servicing persist, compounded by global geopolitical tensions and trade disruptions, necessitating vigilant risk management.

ISLAMIC MONEY MARKET AND FIXED INCOME OUTLOOK

The Islamic money market has mirrored the conventional segment's trends, with strong demand for Shariah-compliant instruments. Variable rate GoP Ijarah Sukuk saw significant participation, with PKR 257.8 billion in bids against a PKR 50 billion target in June 2025, though only PKR 159.9 billion was accepted. Fixed rate Ijarah Sukuk also attracted robust interest, with PKR 94.5 billion in bids against a PKR 75 billion target, with PKR 43.7 billion raised. These trends reflect growing investor confidence in Shariah-compliant instruments amid declining yields and a stable macroeconomic environment.

INVESTMENT STRATEGY

- **Islamic Income Segment:** We are shifting from longer-term fixed rate Sukuk to floating rate Sukuk. Active trading in GoP Ijarah Sukuk at optimal yields will further augment returns.
- **Islamic Money Market Segment:** An aggressive approach will be maintained, with higher allocations in GoP Ijarah Sukuk to enhance returns. However, for Islamic Cash Funds, we adopt a conservative stance, minimizing exposure to GoP Ijarah Sukuk to prioritize liquidity and stability.
- **Risk Mitigation:** We will closely monitor market dynamics and adjust allocations to balance yield optimization with Shariah-compliant liquidity requirements, ensuring alignment with investor mandates.

RISKS AND CONSIDERATIONS

Despite the positive outlook, several risks warrant attention:

- **External Pressures:** Geopolitical tensions, including US-China trade disputes and regional frictions with India, alongside external debt servicing, could strain foreign reserves.
- **Domestic Challenges:** Weak revenue mobilization, circular debt, and industrial output constraints remain structural hurdles. The Federal Budget FY26's success in implementing fiscal reforms will be critical.
- **Policy Uncertainty:** While further policy rate cuts to 10% are possible, the SBP's cautious stance suggests limited room for aggressive easing without robust macroeconomic support.

The FY25 money market outlook for both conventional and Islamic segments is characterized by cautious optimism, driven by declining inflation, a resilient external account, and monetary policy easing. Our strategy emphasizes flexibility, with a focus on shorter-tenor instruments and selective Sukuk allocations to optimize yields while maintaining liquidity. By actively managing duration, negotiating favorable deposit deals, and monitoring macroeconomic and geopolitical developments, we aim to deliver stable returns while mitigating risks in an evolving economic landscape. As we move into FY26, disciplined fiscal and monetary policies, alongside sustained external support, will be pivotal in sustaining Pakistan's economic stabilization and unlocking further investment opportunities.

STOCK MARKET OUTLOOK

Pakistan's Stock Market exhibited stellar performance last year due to its attractive valuation amid improved macroeconomic indicators such as historic low inflation, current account surplus, and successful completion of the IMF Extended Fund Facility. Going forward, we anticipate that market will further perform due to expected resolution of the circular debt (both power & gas) which is the prerequisite of the IMF program. Low-cost housing project announced by government in budget will underpin the construction industry which will positively impact the equity market.

To The Board of Directors of ABL Asset Management Company Limited

1. Introduction

We have undertaken a reasonable assurance engagement that the Securities and Exchange Commission of Pakistan (the SECP) has required in terms of its Shariah Governance Regulations, 2023 (the Regulations) – External Shariah Audit of **ABL Islamic Financial Planning Fund (the Fund)** for assessing compliance of the Fund's financial arrangements, contracts, and transactions having Shariah implications with the Shariah principles for the year ended June 30, 2025. This engagement was conducted by a multidisciplinary team including assurance practitioners and independent Shariah scholar.

2. Applicable Criteria

The criteria for the assurance engagement, against which the underlying subject matter (financial arrangements, contracts, and transactions having Shariah implications for the year ended June 30, 2025) is assessed, comprise of the Shariah principles and rules, as defined in the Regulations and reproduced as under:

- a) legal and regulatory framework administered by the SECP;
- b) Shariah standards issued by the Accounting and Auditing Organization for Islamic Financial Institutions (AAOIFI), as notified by the SECP;
- c) Islamic Financial Accounting Standards, developed by the Institute of Chartered Accountants of Pakistan (ICAP), as notified by the SECP;
- d) guidance and recommendations of the Shariah advisory committee, as notified by the SECP; and
- e) approvals, rulings or pronouncements of Shariah Supervisory board or the Shariah Advisor of the Islamic financial institution, in line with (a) to (d) above.

Our engagement was carried out as required under Regulation 29 of Chapter VII of the Regulations.

The above criteria were evaluated for their implications on the financial statements of the Fund for the year ended June 30, 2025, which are annexed.

3. Management's Responsibility for Shariah Compliance

INDEPENDENT AUDITORS' REPORT

To the Unit Holders of ABL Islamic Financial Planning Fund

Report on the Audit of Financial Statements

Opinion

We have audited the financial statements of **ABL Islamic Financial Planning Fund (the Fund)**, which comprise the statement of assets and liabilities as at June 30, 2025, the income statement, the statement of movement in unit holders' fund and the cash flow statement for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund as at June 30, 2025, and of its financial performance and its cash flows for the year then ended in accordance with accounting and reporting standards as applicable in Pakistan.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) as applicable in Pakistan. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Fund and ABL Asset Management Company Limited (the Management Company) in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants as adopted by the Institute of Chartered Accountants of Pakistan (the Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Following is the key audit matter:

Key audit matter	How the matter was addressed in our audit
<p>Valuation of investments</p> <p>As disclosed in note 5 to the financial statements, the investments held at fair value through profit or loss aggregated to Rs. 381 million as at June 30, 2025.</p> <p>In view of the significance of investment in relation to the total assets and the net asset value of the Fund, we have considered the valuation of investments as a key audit matter.</p>	<p>In order to address the matter, we performed the following procedures:</p> <ul style="list-style-type: none"> • Obtained an understanding of the Fund's process over acquisition, disposals and periodic valuation of the investment portfolio and evaluated / tested controls in those areas for the purpose of the audit; • Tested the valuations directly to pricing sources; • Assessed the valuation process / methodologies being followed by the fund and checked whether the investments are carried as per the valuation methodology specified in the accounting policies; and • Evaluated the adequacy of the overall disclosures in the financial statements in respect of the investment portfolio in accordance with the requirements of the regulations and applicable financial reporting standards.

Information Other than the Financial Statements and Auditors' Report Thereon

Management is responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements and our auditors' report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Management Company and Board of Directors for the Financial Statements

The Management Company is responsible for the preparation and fair presentation of the financial statements in accordance with accounting and reporting standards as applicable in Pakistan, and for such internal control as the Management Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Management Company is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Management Company either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Board of Directors of the Management Company are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs as applicable in Pakistan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs as applicable in Pakistan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Management Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Management Company.
- Conclude on the appropriateness of the Management Company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to

events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Board of Directors of the Management Company regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Board of Directors of the Management Company with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the Board of Directors of the Management Company, we determine those matters that is of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

In our opinion, the financial statements have been prepared in accordance with the relevant provisions of the Non-Banking Finance Companies and Notified Entities Regulations, 2008.

The engagement partner on the audit resulting in this independent auditor's report is Muhammad Sufyan.

The accounting policies adopted in the preparation of these financial statements are consistent with those of the previous financial year, except for following amendments to accounting standards which are effective for annual years beginning on or after July 01, 2025. However, these do not have significant impact on the Fund's operations and, therefore, have not been disclosed in these financial statements.

2.5 Critical accounting estimates and judgments

The preparation of financial statements in conformity with the accounting and reporting standards requires the management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The estimates, judgments and associated assumptions are based on historical experience and various other factors including expectations of future events that are believed to be reasonable under the circumstances, the results of which form the basis of making judgements about carrying values of assets and liabilities. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimate is revised if the revision affects only that year, or in the year of revision and future years if the revision affects both current and future years.

The estimates and judgments that have a significant effect on these financial statements of the Fund relate to classification and valuation of financial assets (notes 3.2 and 5), provision for SWWF (note 10.1), provision for Federal Excise Duty (note 7.3) and provision for taxation (notes 3.14 and 13).

2.5.1 Judgements:

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the financial statements:

- a) Classification of financial assets (Note 3.3)

2.5.2 Estimates and assumptions:

The key assumptions concerning future and other key sources of estimation uncertainty at the reporting date, that have a significant risks of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

- a) Provision for taxation (Note 3.12 and 12)
- b) Provision for Federal Excise Duty (Note 6.3)
- c) Valuation of financial assets (Note 3.2 and 5)

2.6 Accounting convention

These financial statements have been prepared under the historical cost convention except that investments have been carried at fair values.

2.7 Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the Fund operates. These financial statements are presented in Pakistan Rupee, which is the Fund's functional and presentation currency.

3 MATERIAL ACCOUNTING POLICY INFORMATION

The accounting policies, related judgements, estimates and related assumptions adopted for the preparation of these financial statements are the same as those applied in the preparation of the financial statements for the year ended June 30, 2024.

3.1 Cash and cash equivalents

Cash and cash equivalents comprises bank balances and short term highly liquid investments, with original maturity of three months or less, that are readily converted into known amount of cash, are subject to insignificant change in value, and are held for the purpose of meeting short term cash commitments.

3.2 Financial assets

3.2.1 Classification and subsequent measurement

Debt instruments

There are three principal classification categories for debt instruments:

- at amortised cost
- at fair value through other comprehensive income "(FVTOCI)"
- at fair value through profit or loss "(FVTPL)"

Financial asset at amortised cost

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL:

- 1) the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- 2) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial instruments classified as amortised cost are subsequently carried at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses, if any. Interest / markup income and impairment are recognised in the income statement.

Financial asset at FVTOCI

A financial asset is classified as FVTOCI only if it meets both of the following conditions and is not designated as FVTPL:

- 1) the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- 2) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition, for an equity investment that is not held for trading, the Fund may irrevocably elect to present subsequent changes in fair value in OCI, only dividend income is recognized in income statement. This election is made on an investment-by-investment basis.

FVTOCI financial assets are subsequently measured at fair value with gains and losses arising due to changes in fair value recognised in OCI.

Financial asset at FVTPL

All other financial assets are classified as FVTPL (for example: equity held for trading and debt securities not classified either as AC or FVTOCI).

In addition, on initial recognition, the Fund may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at FVTOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets are not reclassified subsequent to their initial recognition, except in the year after the Fund changes its business model for managing financial assets.

Financial assets designated at fair value through profit or loss are subsequently carried at fair value. Net gains and losses, including any interest / markup or dividend income, are recognised in income statement. All of Fund's investments are held for trading purposes.

Business model assessment

The business model is determined under IFRS 9 at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. It is not an instrument-by-instrument analysis; rather it can be performed at a higher level aggregation. It is typically observable through the activities that the entity undertakes to achieve the objective of the business model; all relevant evidence that is available at the date of the assessment (including history of sales of the financial assets) are considered. Following three business models are defined under the IFRS 9:

- 1) Hold to collect business model
- 2) Hold to collect and sell business model
- 3) FVTPL business model

Considering above, the Fund classifies its investments based on the Fund's hold to sell business model. The evaluation of the performance of the Fund has been performed on fair value basis for the entire portfolio, as reporting to the key management personnel and to the investors in the form of net asset value (NAV). The investment portfolio of financial assets is managed and performance is evaluated on a fair value basis. The Fund is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. Consequently, all the investments are measured at fair value through profit or loss. For other financial assets which are held for collection continue to be measured at amortised cost.

Basis of valuation of open ended Mutual funds

The open ended mutual funds are valued on the basis of closing quoted market prices available at the MUFAP website.

3.2.2 Impairment

The Fund assesses on a forward looking basis the expected credit loss (ECL) associated with its financial assets (other than debt instruments) carried at amortised cost and FVOCI. The Fund recognises loss allowances for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

For debt instruments, the Fund follows the requirements of Circular 33 of 2012 (the "Circular") for impairment of debt securities. Under the Circular, provision for non-performing debt securities is made on the basis of time based criteria as prescribed in the Circular. Impairment losses recognised on debt securities can be reversed through the income statement.

As allowed under circular no. 13 of 2009 dated May 04, 2009 issued by the SECP, the Management Company may also make provision against debt securities over and above minimum provision requirement prescribed in aforesaid Circular, in accordance with the provisioning policy approved by the Board of Directors and disseminated by the Management Company on its website.

3.2.3 Regular way contracts

All regular way purchases and sales of financial assets are recognised on the trade date i.e. the date on which the Fund commits to purchase or sell the asset.

3.2.4 Initial recognition and measurement

Financial assets are recognised at the time the Fund becomes a party to the contractual provisions of the instruments. These are initially recognised at fair value plus transaction costs except for financial assets carried 'at fair value through profit or loss'. Financial assets carried 'at fair value through profit or loss' are initially recognised at fair value and transaction costs associated with these financial assets are charged to the Income Statement.

3.2.5 Determination of fair value

The fair value of financial assets are determined as follows:

i) Debt Securities (other than Government securities)

The debt securities are valued on the basis of rates determined by Mutual Funds Association of Pakistan (MUFAP) in accordance with the methodology prescribed by SECP for valuation of debt securities vide its Circular No. 33 of 2012 dated 24 October 2012. In determination of the rates, MUFAP takes into account the holding pattern of these securities and categorises them as traded, thinly traded and non-traded securities. The circular also specifies the valuation process to be followed for each category as well as the criteria for the provisioning of non-performing debt securities.

ii) Debt Securities (Government securities)

The government securities not listed on a stock exchange and traded in the interbank market value are valued at the average rates quoted on a widely used electronic quotation system (PKRV rates) which are based on the remaining tenure of the securities.

3.2.6 Derecognition

Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Fund has transferred substantially all risks and rewards of ownership. Any gain or loss on derecognition of financial assets is taken to the Income Statement.

3.2.7 Derivatives

Derivative instruments are initially recognised at fair value and subsequent to initial measurement each derivative instrument is remeasured to its fair value and the resultant gain or loss is recognised in the Income Statement.

3.2.8 Basis of valuation of investments in Collective Investment Schemes

The fair value of the investments in Open Ended Collective Investment Schemes is determined by reference to the NAV quotations obtained from the MUFAP website.

3.3 Financial liabilities

Financial liabilities are recognised at the time when the Fund becomes a party to the contractual provisions of the instruments. These are initially recognised at fair values and subsequently stated at amortised cost.

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expired. Any gain or loss on derecognition of financial liabilities is taken to the Income Statement.

3.3.1 Classification and subsequent measurement

Financial liabilities are derecognised when they are extinguished (i.e when the obligation specified on the contract is discharged, cancelled or expires).

3.3.2 Derecognition

Financial liabilities are classified and subsequently measured at amortized cost.

3.4 Provisions

Provisions are recognised when the Fund has a present, legal or constructive, obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the obligation can be made. Provisions are regularly reviewed and adjusted to reflect the current best estimate.

3.5 Offsetting of financial assets and liabilities

Financial assets and liabilities are offset and the net amount is reported in the 'Statement of Assets and Liabilities' when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

3.6 Net asset value per unit

The Net Asset Value (NAV) per unit as disclosed in the Statement of Assets and Liabilities is calculated by dividing the net assets of the Fund by the number of units in circulation at the year end.

As per the offering document, Net assets value (NAV) of the Allocation Basket / Plan means the per unit value of the relevant Basket / Plan being offered under the Fund and the NAV of each Allocation Basket / Plan shall be announced. Accordingly the individual elements of the financial statements of each of the above Allocation Basket and NAV are being separately disclosed in these financial statements.

3.7 Issue and redemption of units

Units issued are recorded at the offer price, determined by the Management Company for the applications received by the Management Company / distributors during business hours on that day. The offer price represents the Net Asset Value (NAV) per unit as of the close of the business day, plus the allowable sales load and provision of any duties and charges if applicable. The sales load is payable to the Management Company / distributors.

Units redeemed are recorded at the redemption price applicable to units for which the Management Company / distributors receive redemption application during business hours of that day. The redemption price is equal to NAV as of the close of the business day, less an amount as the Management Company may consider to be an appropriate provision of duties and charges.

3.8 Distributions to unit holders

Distributions to the unit holders are recognised upon declaration and approval by the Board of Directors of the Management Company. Based on the Mutual Funds Association of Pakistan's (MUFAP) guidelines duly consented by the SECP, distribution for the year also includes portion of income already paid on units redeemed during the year.

Distributions declared subsequent to the year end reporting date are considered as non-adjusting events and are recognised in the financial statements of the year in which such distributions are declared and approved by the Board of Directors of the Management Company.

3.9 Element of income / (loss) and capital gains / (losses) included in prices of units issued less those in units redeemed

Element of income represents the difference between net assets value per unit on the issuance or redemption date, as the case may be, of units and the net assets value per unit at the beginning of the relevant accounting period. Further, the element of income is a transaction of capital nature and the receipt and payment of element of income is taken to unit holders' fund. However, to maintain the same ex-dividend net asset value of all units outstanding on the accounting date, net element of income contributed on issue of units lying in unit holders fund will be refunded on units in the same proportion as dividend bears to accounting income available for distribution.

3.10 Revenue recognition

- Gains / (losses) arising on sale of investments are recorded at the date at which the transaction takes place.
- Income from investments in government securities is recognised on an accrual basis using effective interest method.
- Dividend income is recognised when the Fund's right to receive the same is established.
- Unrealised gains / (losses) arising on re-measurement of investments classified as 'financial assets at fair value through profit or loss' are recorded in the year in which these arise.
- Interest income on bank balances is recognised on accrual basis.

3.11 Expenses

All expenses chargeable to the fund including remuneration of the management company, trustee fee and annual fee of the SECP are recognised in the Income Statement on an accrual basis.

3.12 Taxation

The income of the Fund is exempt from income tax under clause 99 of Part I of the Second Schedule to the Income Tax Ordinance, 2001 subject to the condition that not less than ninety percent of its accounting income for the year, as reduced by capital gains, whether realised or unrealised, is distributed to the unit holders in cash.

The Fund is also exempt from the provisions of section 113 (minimum tax) under clause 11A of Part IV of the Second Schedule to the Income Tax Ordinance, 2001.

3.13 Earnings per unit

Earnings per unit is calculated by dividing the net income of the year before taxation of the Fund by the weighted average number of units outstanding during the year. The determination of earning per unit is not practicable as disclosed in note 12.

3.14 Foreign currency translation

Transactions denominated in foreign currencies are accounted for in Pakistan Rupees at the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates for monetary assets and liabilities denominated in foreign currencies are recognised in the Income Statement.

- 6.1 As per regulation 61 of the NBFC Regulations, 2008, the Management Company is entitled to a remuneration equal to an amount not exceeding the maximum rate of management fee as disclosed in the Offering Document subject to the total expense ratio limit. Keeping in view the maximum allowable threshold, the Management Company has charged its remuneration at the rate of 1% (2024: 1%) of the Fund's investment in cash and cash equivalents. The remuneration is payable to the Management Company monthly in arrears.
- 6.2 During the year, an aggregate amount of Rs 0.089 million (2024: 0.204 million) was charged on account of sales tax on the management fee levied through the Punjab Sales Tax on Services Act, 2012 at the rate of 16% (2024:16%).
- 6.3 The Finance Act, 2013 enlarged the scope of Federal Excise Duty (FED) on financial services to include Asset Management Companies (AMCs) as a result of which FED at the rate of 16 percent on the remuneration of the Management Company and sales load was applicable with effect from June 13, 2013. The Management Company was of the view that since the remuneration was already subject to provincial sales tax, further levy of FED would result in double taxation which did not appear to be the spirit of the law. Hence, on September 4, 2013 a constitutional petition was filed with the Sindh High Court (SHC) by the Management Company together with various other asset management companies challenging the levy of FED.

With effect from July 1, 2016, FED on services provided or rendered by non-banking financial institutions dealing in services which are subject to provincial sales tax has been withdrawn by the Finance Act, 2016.

During the year ended June 30, 2017, the SHC passed an order whereby all notices, proceedings taken or pending, orders made, duty recovered or actions taken under the Federal Excise Act, 2005 in respect of the rendering or providing of services (to the extent as challenged in any relevant petition) were set aside. In response to this, the Deputy Commissioner Inland Revenue has filed a Civil Petition for leave to appeal in the Supreme Court of Pakistan which is pending adjudication.

In view of the above, the Fund has discontinued making further provision in respect of FED on remuneration of the Management Company with effect from July 1, 2016. However, as a matter of abundant caution the provision for FED made for the period from December 21, 2015 till June 30, 2016 amounting to Rs 0.015 million and Rs 0.003 million is being retained for Active Allocation Plan and Conservative Allocation Plan respectively in these financial statements as the matter is pending before the Supreme Court of Pakistan. Had the provision for FED not been made, the Net Asset Value of the Active Allocation Plan and Conservative Allocation Plan as at June 30, 2025 would have been higher by Re. 0.0140 and Re. 0.0021 (June 30, 2024: Re. 0.0168 and Re. 0.0002) per unit respectively.

- 6.4 In accordance with Regulation 60 of the NBFC Regulations, the Management Company is entitled to charge fees and expenses related to registrar services, accounting, operation and valuation services, related to a Collective Investment Scheme (CIS).

The Management Company, was charging accounting and operational charges at 0.10% of average annual net assets of the Fund until June 30, 2024. However, during the period with effect from July 01, 2024, the Management Company has stopped charging Accounting and operational charges to the Fund.

- 6.5 On December 31, 2024, pursuant to the SECP's order dated September 9, 2024, the Management Company has distributed the following in the form of newly issued units to the unitholders of the Fund on account of excess allocated expenses charged by the Management Company to the Fund during the years ended December 31, 2022 and December 31, 2023.

16 FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Fund's objective in managing risk is the creation and protection of unit holders' value. Risk is inherent in the Fund's activities, but it is managed through monitoring and controlling activities which are primarily set up to be performed based on limits established by the Management Company, the constitutive documents of the Fund and the regulations and directives of the SECP. These limits reflect the business strategy and market environment of the Fund as well as the level of the risk that the Fund is willing to accept. The Board of Directors of the Management Company supervises the overall risk management approach within the Fund. The Fund is exposed to market risk, liquidity risk and credit risk arising from the financial instruments it holds.

16.1 Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate as a result of changes in market prices.

The Management Company manages the market risk through diversification of the investment portfolio and by following the internal guidelines established by the Investment Committee.

Market risk comprises of three types of risks: yield / interest rate risk, currency risk, and price risk.

(i) Yield / interest rate risk

Yield / interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate as a result of changes in market interest rates. As of June 30, 2025, the Fund is exposed to such risk on bank balances. The Investment Committee of the Fund reviews the portfolio of the Fund on a regular basis to ensure that the risk is managed within the acceptable limits.

a) Sensitivity analysis for variable rate instruments

Presently, the Fund holds bank balances which expose the Fund to cash flow interest rate risk. In case of 100 basis points increase / decrease in applicable rates on the last repricing date with all other variables held constant, the net income for the year and net assets of the Active Allocation Plan, Aggressive Allocation Plan, Conservative Allocation Plan, Strategic Allocation Plan, Strategic Allocation Plan III, Capital Preservation Plan I and Capital Preservation Plan II would have been higher / lower by Rs. 0.068 million, Rs. 0.309 million, Rs. 0.028 million)

b) Sensitivity analysis for fixed rate instruments

As at June 30, 2025, the Fund does not hold any fixed rate instrument that may expose the Fund to fair value interest rate risk.

Yield / interest rate sensitivity position for on-balance sheet financial instruments is based on the earlier of contractual repricing or maturity date and for off-balance sheet instruments is based on the settlement date.

The Fund's interest rate sensitivity related to financial assets and financial liabilities as at June 30, 2025 can be determined as follows:

(ii) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate as a result of changes in foreign exchange rates. The Fund does not have any financial instruments in foreign currencies and hence is not exposed to such risk.

(iii) Price risk

Price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk) whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

The Fund has exposure to equity price risk arising from the Fund investments in open end mutual funds. The Fund manages its price risk arising from investments by diversifying its portfolio within the eligible limits prescribed in the Fund's Constitutive Documents, the NBFC Regulations and circulars issued by SECP from time to time.

In case of 1% increase / (decrease) in the net asset value per unit of the funds, with all other variables held constant, the net income for the year and net assets of the Active Allocation Plan, Aggressive Allocation Plan, Conservative Allocation Plan, Strategic Allocation Plan, Strategic Allocation Plan III, Capital Preservation Plan I and Capital Preservation Plan II would have been higher / lower by Rs. 0.8681 million (2024: Rs. 0.836 million), Rs. 0.000 million (2024: Rs. 0.003 million), Rs. 1.5785 million (2024: Rs. 18.616 million), Rs. 0.000 million (2024: Rs. 0.216 million), Rs. 0.000 million (2024: Rs. 0.087 million), Rs. 1.3692 million (2024: Rs. 2.291 million) and Rs. 0.000 million (2024: Rs. 0.298 million) respectively.

16.2 Liquidity risk

Liquidity risk is the risk that the Fund may not be able to generate sufficient cash resources to settle its obligation in full as they fall due or can only do so on terms that are materially disadvantageous to the Fund.

The Fund is exposed to daily redemptions at the option of unit holders. The Fund's approach to managing liquidity is to ensure, as far as possible, that the Fund will always have sufficient liquidity to meet its liabilities when due under both normal and stressed conditions. The Fund's policy is, therefore, to invest the majority of its assets in investments that are traded in an active market and can be readily disposed and are considered readily realisable.

In order to manage the Fund's overall liquidity, the Fund may also withhold daily redemption requests in excess of ten percent of the units in issue and such requests would be treated as redemption requests qualifying for being processed on the next business day. Such procedure would continue until the outstanding redemption requests come down to a level below ten percent of the units then in issue. The Fund did not withhold any redemptions during the year.

The table below summarises the maturity profile of the Fund's financial instruments. The analysis into relevant maturity groupings is based on the remaining period at the end of the reporting period to the contractual maturity dates. However, the assets and liabilities that are receivable / payable on demand including bank balances have been included in the maturity grouping of one month:

18 UNIT HOLDERS' FUND RISK MANAGEMENT

The unit holders' fund is represented by redeemable units. These units are entitled to dividends and to payment of a proportionate share based on the Fund's Net Asset Value per unit on the redemption date. The relevant movements are shown in the 'Statement of Movement in Unit Holders' Fund'.

The Fund has no restriction on the subscription and redemption of units. As required under the NBFC Regulations, 2008 every open end scheme shall maintain fund size (i.e. net assets of the Fund) of Rs 100 million at all times during the life of the scheme. The Fund has historically maintained and complied with the requirement of minimum fund size at all times.

The Fund's objectives when managing unit holders' funds are to safeguard its ability to continue as a going concern so that it can continue to provide returns to the unit holders and to maintain a strong base of assets to meet unexpected losses or opportunities.

In accordance with the risk management policies as stated in note 18, the Fund endeavours to invest the subscriptions received in appropriate investment avenues while maintaining sufficient liquidity to meet redemptions, such liquidity being augmented by disposal of investments or short-term borrowings, where necessary.

مینجمنٹ کمپنی کی کوالٹی کی درجہ بندی

25 اکتوبر 2024 کو: پاکستان کریڈٹ ریٹنگ ایجنسی لمیٹڈ (PACRA) نے اے بی ایل ایسیٹ مینجمنٹ کمپنی (ABL AMC) کی مینجمنٹ کوالٹی ریٹنگ (MQR) کو (AM-One) (AM1) تفویض کی ہے۔ تفویض کردہ درجہ بندی پر آؤٹ لک مستحکم ہے۔

آؤٹ لک اور اسٹریٹیجی

جیسا کہ ہم مالی سال 2025 (FY25) اور آگے بڑھنے کے منصوبے پر غور کرتے ہیں، روایتی اور اسلامی دونوں طبقات کے لیے کرنسی مارکیٹ کا منظر نامہ محتاط طور پر پر امید نقطہ نظر پیش کرتا ہے، جس کی بنیاد اہم مانیٹری پالیسی میں نرمی، گرتی ہوئی افراط زر، اور مستحکم بیرونی اکاؤنٹ ہے۔ اسٹیٹ بینک آف پاکستان (SBP) نے جون 2024 سے پالیسی ریٹ میں 1,100 بیسیس پوائنٹس کی کمی کی، جو کہ جون 2025 تک 11.0 فیصد تک پہنچ گئی، جس سے لیکویڈیٹی اور سرمایہ کاری کے مواقع کے لیے سازگار ماحول پیدا ہوا۔ تاہم، ابھرتے ہوئے مواقع سے فائدہ اٹھاتے ہوئے ممکنہ خطرات کو نیویگیٹ کرنے کے لیے گھریلو اور عالمی حرکیات کو تیار کرنے کے لیے ایک سمجھدار اور چست سرمایہ کاری کی حکمت عملی کی ضرورت ہے۔

سکوک مختص کرنے پر توجہ دی گئی ہے تاکہ لیکویڈیٹی کو برقرار رکھتے ہوئے پیداوار کو بہتر بنایا جاسکے۔ مدت کا فعال طور پر انتظام کر کے، ڈیپازٹ کے سازگار سودوں پر گفت و شنید کر کے، اور میکرو اکنامک اور جیو پالیٹیکل پیش رفت کی نگرانی کر کے، ہمارا مقصد ایک ابھرتے ہوئے معاشی منظر نامے میں خطرات کو کم کرتے ہوئے مستحکم منافع فراہم کرنا ہے۔ جیسا کہ ہم مالی سال 26 میں آگے بڑھ رہے ہیں، مستقل بیرونی مدد کے ساتھ ساتھ نظم و ضبط کی مالی اور مالیاتی پالیسیاں، پاکستان کے معاشی استحکام کو برقرار رکھنے اور سرمایہ کاری کے مزید مواقع کو کھولنے میں اہم ثابت ہوں گی۔

سرمایہ کاری کی حکمت عملی

• اسلامی آمدنی کا طبقہ

ہم طویل مدتی مقررہ شرح سکوک سے فلوٹنگ ریٹ سکوک میں منتقل ہو رہے ہیں۔ حکومتی اجارہ سکوک میں زیادہ سے زیادہ پیداوار پر فعال ٹریڈنگ منافع میں مزید اضافہ کرے گی۔

• اسلامک منی مارکیٹ سیگمنٹ

ریٹرن کو بڑھانے کے لیے حکومتی اجارہ سکوک میں زیادہ مختص کے ساتھ ایک جارحانہ انداز اپنایا جائے گا۔ تاہم، اسلامک کیش فنڈز کے لیے، ہم ایک قدامت پسندانہ موقف اپناتے ہیں، جس سے جی او پی اجارہ سکوک کی نمائش کو کم کرتے ہوئے لیکویڈیٹی اور استحکام کو ترجیح دیتے ہیں۔

• خطرے کی تخفیف

ہم مارکیٹ کی حرکیات کو قریب سے مانیٹر کریں گے اور سرمایہ کاروں کے مینڈیٹ کے ساتھ صف بندی کو یقینی بناتے ہوئے شریعت کے مطابق لیکویڈیٹی کی ضروریات کے ساتھ پیداوار کی اصلاح کو متوازن کرنے کے لیے مختص کو ایڈجسٹ کریں گے۔

خطرات اور تحفظات

مثبت نقطہ نظر کے باوجود، کئی خطرات توجہ کی ضمانت دیتے ہیں:

• بیرونی دباؤ:

جغرافیائی سیاسی کشیدگی، بشمول امریکہ-چین تجارتی تنازعات اور بھارت کے ساتھ علاقائی تنازعات، بیرونی قرضوں کی فراہمی کے ساتھ، غیر ملکی ذخائر کو دبا سکتے ہیں۔

گھریلو چیلنجز:

آمدنی کی کمزوری، گردش قرضہ، اور صنعتی پیداوار کی رکاوٹیں ساختی رکاوٹیں ہیں۔ مالیاتی اصلاحات کے نفاذ میں وفاقی بجٹ FY26 کی کامیابی اہم ہوگی۔

پالیسی کی غیر یقینی صورتحال:

اگرچہ پالیسی کی شرح میں مزید 10 فیصد تک کمی ممکن ہے، اسٹیٹ بینک کا محتاط موقف مضبوط میکرو اکنامک سپورٹ کے بغیر جارحانہ نرمی کے لیے محدود گنجائش تجویز کرتا ہے۔

روایتی اور اسلامی دونوں طبقوں کے لیے مالیاتی مارکیٹ کا مالیاتی نقطہ نظر محتاط رجحانیت پر مبنی ہے، جو گرتی ہوئی افراط زر، ایک لچکدار بیرونی کھاتہ، اور مانیٹری پالیسی میں نرمی کے ذریعے کارفرما ہے۔ ہماری حکمت عملی لچک پر زور دیتی ہے، جس میں مختصر مدت کے آلات اور سلیکیٹیو

IMF EFF پروگرام کے تسلسل اور حکومت کی نجکاری کی پائپ لائن بشمول SOEs اور توانائی کمپنیوں کے حصص کو آف لوڈ کرنے کے منصوبے نے سرمایہ کاروں کے جذبات کو مزید مضبوط کیا۔ مزید برآں، اسمگلنگ، حوالات کی کارروائیوں، اور قیاس آرائی پر مبنی کرنسی کی سرگرمیوں پر مستقل کنٹرول نے پاکستان کے بیرونی کھاتوں کے استحکام کے بیانیے میں اعتبار پیدا کیا۔

اسٹیٹ بینک آف پاکستان نے ڈیٹا پر مبنی مانیٹری پالیسی کا موقف برقرار رکھا، جس نے CPI افراط زر میں کمی کے جواب میں پالیسی ریٹ کو 22% سے کم کر کے 11 فیصد کر دیا، جو سال کے دوران اوسطاً 4.62 فیصد تھی۔ نتیجے کے طور پر، حقیقی سود کی شرحیں ایک قابل ذکر مارجن سے مثبت ہوئیں، طویل مدتی سرمایہ کاروں کے اعتماد میں اضافہ۔

غیر ملکی سرمایہ کار خالص فروخت کنندگان تھے، جنہوں نے سال کے دوران USD 304.34 ملین کا اخراج ریکارڈ کیا۔ ملکی سطح پر، بینکوں اور دیگر تنظیموں نے بالترتیب USD 15.68 ملین اور USD 7.54 ملین کی خالص فروخت کی۔ اس کے برعکس، میوچل فنڈز اور کمپنیوں نے بالترتیب USD 218.54 ملین اور USD 51.12 ملین کی خالص خریداری کے ساتھ مارکیٹ کو سپورٹ کیا۔
