## REPORT OF THE DIRECTORS OF THE MANAGEMENT COMPANY

The Board of Directors of ABL Asset Management Company Limited, the management company of ABL Stock Fund (ABL-SF), is pleased to present the un-audited Condensed Interim Financial Statements of ABL-SF for the quarter ended September 30, 2010.

## ECONOMIC PERFORMANCE REVIEW

Economic conditions suffered another blow during the period under review due to massive floods countrywide and its impact on macro indicators. CPI Inflation swelled to 13.77% YoY during the quarter; consequently, the Discount Rate was increased by a cumulative 100 bps by the Central Bank during the period under review. Higher oil prices and stagnant exports resulted in current account deficit widening to USD944 million in the first two months of the quarter from USD635 million a year earlier. However remittances during the period increased to USD2.65 billion which helped keep some check on the widening deficit. Fiscal picture remained challenging with Government borrowing from central bank swelling to PKR149 billion during the quarter. The money creation helped system liquidity but rising interest rates and high Government borrowing continued to crowd out private sector credit which shrank by 1.7% during the period. Discussions with IMF regarding remaining installments were also in jeopardy as Pakistan did not meet IMF conditions entailing implementation of Reformed GST, removal of power subsidies and resolution of circular debt. On the positive side, foreign exchange reserves increased to USD17 billion, supported by flows from UN, IMF and remittances received during the period.

## MARKET OVERVIEW

Equities remained sluggish with low turnover during the period under review as compared to regional markets which were awash with liquidity and delivered superior performance. Foreign flows were the main driving factor across the emerging markets. Pakistan equity market also fetched around US\$106 million during the period. Apart from unstable macroeconomic conditions and flash floods across the country, the imposition of capital gain tax related issues kept domestic players away from local market. The month of Ramadan and delays in the launch of leverage product also kept volumes low. Despite a very healthy corporate result season, Karachi Stock Exchange benchmark 30 index grew only by 1.23% during the quarter after a healthy performance of 23.92% last year.

## MUTUAL FUND INDUSTRY REVIEW

The equity funds' AUMs declined by 1.5% during 2mFy11 to close at Rs.38.6bn against 0.94% appreciation of KSE-100 index in the same period. Equity funds segment of the mutual fund industry witnessed lackluster performance during the period under review, which is in line with the activity witnessed at local bourses. The trend is reflective of investors' aversion to risky asset classes amidst deteriorating macro and political variables.

## FUND PERFORMANCE

During the period under review, ABL Stock Fund's AUM declined slightly by 2% to Rs.368.64 million compare to Rs.376.16 million as at June 30, 2010. On the other hand, ABL-SF posted an absolute return of 3.91% against the benchmark return of 1.23%, an outperformance of 2.68% during the quarter. When measured from its inception date, ABL-SF maintained its position as the best performing fund in its category and posted a return of 37.61% as compared to its benchmark return of 27.24%, depicting a significant out-performance of 10.37%.

ABL Stock Fund earned total income of Rs.19.23 million for the quarter ended September 30, 2010 mainly out of which Rs.9.08 million was earned from unrealized appreciation on revaluation of investments, Rs.6.05 million was earned from dividend income, Rs.2.20 million was capital gain on sale of securities. After accounting for expenses of Rs.3.79 million (comprising mainly of the management fee of Rs.2.84 million) net income from operating activities for the quarter ended September 30, 2010 stood at Rs.15.43 million. With the net element of income/(loss) and capital gains/(losses) of Rs. 1.11 million included in the prices of units issued less those in units redeemed and Rs.0.32 million provision for Workers' Welfare Fund, the net income for the quarter ended September 30, 2010 stood at Rs.16.22 million.

## OUTLOOK

3

Pakistan needs continued support from donors and international agencies to reconstruct infrastructure and rehabilitate flood-affectees. At the same time, the Government needs to pursue aggressive fiscal reforms to improve tax collection, reduce subsidies and control fiscal deficit. The short term impact of such moves could be a spike in inflation and interest rates. However, persistent inflows in emerging markets including local market and much awaited leverage product may underpin a spurt in equities. However, long term growth will solely depend upon our macroeconomic stability and interest rate direction.

ABL-SF will keep an eye on macroeconomic indicators and sectors dynamics to balance allocation mix among the value, growth and high dividend stocks.

## FUND STABILITY RATING

On July 29, 2010, JCR-VIS has assigned Fund Performance Ranking of MFR 5-Star to ABL-SF.

#### MANAGEMENT QUALITY RATING

On December 31, 2009, JCRVIS has reaffirmed the Management Quality Rating of ABL Asset Management Company Limited (ABL AMCL) at 'AM3' (AM-Three), which denotes 'good management quality.'
