

FUND MANAGERS' REPORT

JUNE
2023

ECONOMY AND CAPITAL MARKETS UPDATE

Economic Review

During the month under review, headline inflation surged to 29.4% on a year-on-year (YoY) basis, resulting in an average inflation rate of 29.1% YoY for FY23, compared to 12.2% YoY in the corresponding period last year. However, on a monthly basis, the pace of inflation moderated, as the consumer price index (CPI) declined by 0.3% MoM, in contrast to a 1.6% MoM increase in the previous month and a 6.3% MoM increase in June FY22. This abrupt reduction in inflation can be attributed to a high base effect and a softening of the food and transport indices. Looking ahead, inflationary concerns may persist due to the expected hike in gas and electricity tariffs, which the country has committed to under the stand-by agreement with the International Monetary Fund (IMF) amounting to USD 3bn. On the other hand, this agreement will alleviate some pressure on the domestic currency by bolstering foreign exchange reserves, which stood at USD 4.5bn as of June 23. Furthermore, the country has shown improvements in its current account position, posting a surplus of USD 255mn during the specified period. This marks a significant turnaround from the cumulative deficit of USD 2.9bn in the first 11 months of FY23 compared to a deficit of USD 15.2bn in the same period last year (SPLY). The reduction in the current account deficit was primarily driven by a curtailment in the import balance, which decreased by USD 19.7bn (including goods and services) in the first 11 months of FY23 compared to SPLY, amounting to USD 56.2bn. While the worker's remittances remained relatively stable on a monthly basis, standing at approximately USD 2.1bn.

Money Market Review

Pakistan's CPI inflation in Jun-23 eased down to 29.4% YoY as compared to 37.9% in May-23, that can be attributed to high base effect along with lower food prices. Average inflation in FY-23 stood at 29.1% as compared to 12.1% in FY-22. During the month, core inflation in rural areas was down to 25.2% YoY whereas in urban areas it clocked at 18.5% YoY. SBP increased the policy rate by 100bps in an emergency meeting. This surprise move helped to achieve the staff level agreement on a nine month stand by arrangement of USD 3bn. IMF agreement is expected to provide the much needed support to central bank's forex reserves. SBP reserves stands at USD 4.1Bn (23-6-2023). During the month of Jun'23 market participation remained high (specially in 1Y tenor) in the variable rate Ijarah Sukuk as the total participation stood at PKR 251bn against a target of PKR 130bn. The Ministry, however ended up borrowing a total of PKR 80bn in the variable rate Ijarah Sukuk. In fixed rate Ijarah Sukuks, participation stood high at PKR 200bn against the target of PKR 60bn in 1Y 3Y 5Y tenors. No bids were received for 5Y Tenor. Ministry ended up borrowing PKR 76bn in 1Y & 3Y tenor at a weighted average yield of 18.5%. During the month of Jun-23, SBP conducted 10 shorter tenor OMOs. Islamic banks borrowed a total of PKR 434bn till the end of Jun-23 at a weighted average yield of 21.1% under the Modarba based lending facility.

Stock Market Review

During June'23, the equity market remained volatile and the KMI-30 index dropped by 591 points. Finance minister Ishaq Dar unveiled the much-awaited federal budget on 9th June, which though failed to stir any excitement among the masses. The IMF raised serious objections over the presented budget. However, at the month end Pakistan in an effort to secure agreement with IMF, reviewed the FY24's budget comprehensively and a revised new budget was delivered. Alongside, a surprise 100bps increase in interest rate was announced which took the policy rate to historic high of 22%. At last, after making continuous efforts Pakistan was successful in achieving a significant breakthrough by signing a Standby Arrangement with IMF worth USD 3bn on last day of the fiscal year. Going forward, we believe that a successful follow through on IMF's stand by arrangement, dissolution/completion of assemblies tenor in August and general elections afterwards will remain a key focus in determining the market's fate. Thus, KMI-30 index witnessed a decrease of ~0.8% MOM and closed the period at 70,748 points. However, the average traded volume increased by 14.6% MOM to 53.6mn, and average traded value decreased by 2.2% MOM to USD 8.6mn, respectively. Foreign investors were net buyers of shares worth USD 6.3mn. On the domestic front, Individuals and Companies bought with a net buying of USD 5.2mn, and USD 8.9 mn while Mutual Funds and Insurance Companies were net sellers of USD 14.1mn, and USD 5.3mn, respectively. A sector-wise analysis shows that fertilizer sector and oil marketing sector marked a foreign outflow of USD 0.3mn and 0.2mn, respectively while banks marked a foreign inflow of USD 1.4mn.

INVESTMENT OBJECTIVE

To provide a secure source of savings and regular income after retirement to the Participants

FUND MANAGER'S COMMENTS

ABL Islamic Pension Fund - Debt Sub Fund posted an annualized return of 20.16% during the month of June '23. Other than 52.51% in Govt backed securities, portfolio had an exposure of 12.82 % in Corporate Sukuks and 31.84 % of the fund's assets were placed as Cash at bank.

ABL Islamic Pension Fund - Money Market Sub Fund generated an annualized return of 15.28 % during the month of June '23. During the month significant allocation was maintained as bank deposits (i.e. 71.02 %) owing to better deposit rates offered by banks while 26.09 % of the portfolio was placed in Govt backed securities.

ABL Islamic Pension Fund - Equity Sub Fund generated a return of -0.44 % during the month of June '23. During June'23, the equity market remained volatile and the KMI-30 index dropped by 591 points. Finance minister Ishaq Dar unveiled the much-awaited federal budget on 9th June, which though failed to stir any excitement among the masses. The IMF raised serious objections over the presented budget. However, at the month end Pakistan in an effort to secure agreement with IMF, reviewed the FY24's budget comprehensively and a revised new budget was delivered. Alongside, a surprise 100bps increase in interest rate was announced which took the policy rate to historic high of 22%. At last, after making continuous efforts Pakistan was successful in achieving a significant breakthrough by signing a Standby Arrangement with IMF worth USD 3bn on last day of the fiscal year. Going forward, we believe that a successful follow through on IMF's stand by arrangement, dissolution/completion of assembly's tenor in August and general elections afterwards will remain a key focus in determining the market's fate.

Thus, KMI-30 index witnessed a decrease of -0.8% MOM and closed the period at 70,748 points. However, the average traded volume increased by 14.6% MOM to 53.6mn, and average traded value decreased by 2.2% MOM to USD 8.6mn, respectively. Foreign investors were net buyers of shares worth USD 6.3mn. On the domestic front, Individuals and Companies bought with a net buying of USD 5.2mn, and USD 8.9mn while Mutual Funds and Insurance Companies were net sellers of USD 14.1mn, and USD 5.3mn, respectively. A sector-wise analysis shows that fertilizer sector and oil marketing sector marked a foreign outflow of USD 0.3mn and 0.2mn, respectively while banks marked a foreign inflow of USD 1.4mn.
